Gone Spraying

User Manual v1.3.2

Table of Contents

*Thanks to **Qingbao Meng** for the great photo*

PitchLinks

1.   Overview

GONE SPRAYING allows agricultural pilots to easily track the details of an aerial spraying operation. Its simple design for running on your iPhone uses large buttons to make it great to see and use. Designed and used by an agricultural pilot, GONE SPRAYING is another tool in your arsenal to make life easier in the cockpit.

GONE SPRAYING is available from the Apple App store FREE

You can also try all the PREMIUM features FREE for 1 month!

Point your camera at the QR code and we will whisk you to the download 😊

2. How I Use It!
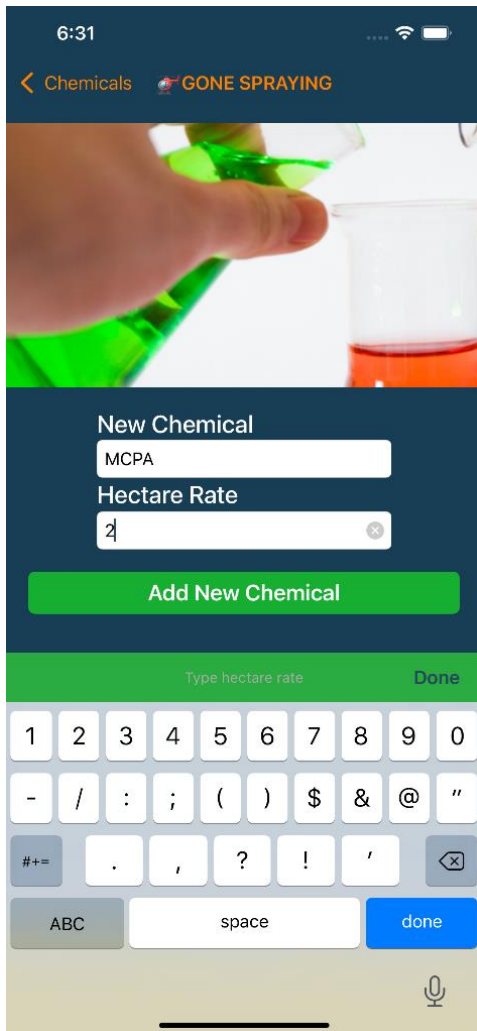

Everyone has a different way of performing spray operations so I will tell you how I use the app. Perhaps you do it slightly differently but I'm sure the basics will be the same. First, I use other tracking systems as well so I may already have the customers details and what they want. If not, I fly to the job and speak with the customer about what they want done and the chemical to use.

2.1 Start New Job

Once we have that information, I open **GONE SPRAYING** and start with the **+** in the top right of the screen to **CREATE A NEW JOB**. This resets all timers and sets up the job for you to begin entering in the details.
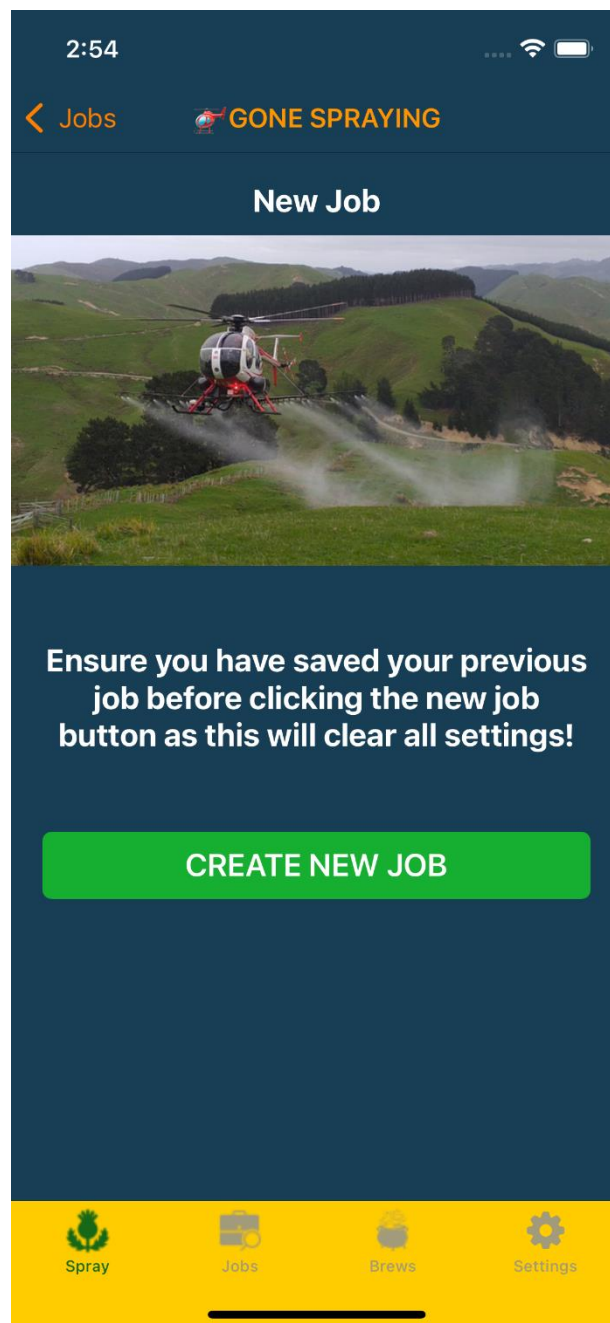

2.2   Add Chemical

I start by adding the chemicals needed. Clicking on one of the four chemical buttons allows you to select a chemical with the correct coverage rate. If it's not there you can click on the **+** to add a chemical and rate, then click on **Add Chemical**. Repeat for other chemicals used. There's a limit of four.

PRO TIP: #1
CLICK ON THE SETTINGS BUTTON TO SET YOUR AREA. (HECTARES OR ACRES)

PRO TIP #2:
WHEN ADDING A CHEMICAL CLICK ON THE TEXT BOX TO ENTER A NEW CHEMICAL NAME. THIS BRINGS UP THE KEYBOARD. IF YOU CLICK ON THE KEYBOARD DONE BUTTON IT WILL JUMP TO THE RATE TEXT BOX AND SWITCH THE KEYBOARD TO A NUMERIC ONE.
THIS IS COMMON ACROSS ALL ENTRY POINTS IN THE APPLICATION. I FIND IT SAVES SOME TIME CLICKING IN AND OUT OF ENTRY-BOXES.

2.3 Set Per Load

Use the **-|+** to set the per load rate.

> **PRO TIP #3:**
>
> *IF YOU ARE COVERING A LARGE AREA PER LOAD, INSTEAD OF STABBING AWAY AT THE + YOU CAN CLICK ON THE NUMBER AND ENTER IN MANUALLY.*

2.4 Add Task

Click on **Add Task** and like the chemical entry you can simply select from a previous chemical or add one. Don't forget your water rate.

PRO TIP #4:

IF YOU USE THE SAME TASK WITH DIFFERENT RATES, IT MAY BE EASIER TO USE THE SEARCH BUTTON TO FILTER.

PRO TIP #5:

KEEP AN EYE ON YOUR AREA COVERED. I COMPARE THIS WITH MY ACTUAL AREA COVERED TO ENSURE I AM APPLYING THE CORRECT AMOUNT OF CHEMICAL.

2.5 Add Aircraft

Click on the **Add Aircraft** button and select your aircraft. You can add a single aircraft in the **+** section if you are running the standard(free) version. You can add 3 if you are running the PRO version and unlimited for PREMIUM.
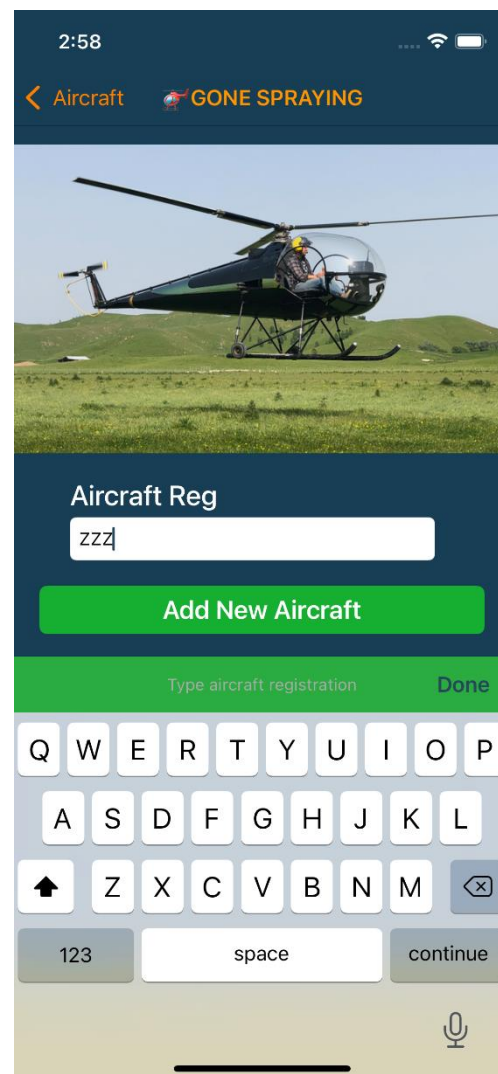

2.6   Add Customer

Click on the **Add Customer** button to select the name of your customer. Adding a location here will also show up in the flight report. Remember you can use the search here as well if you get a lot of names.

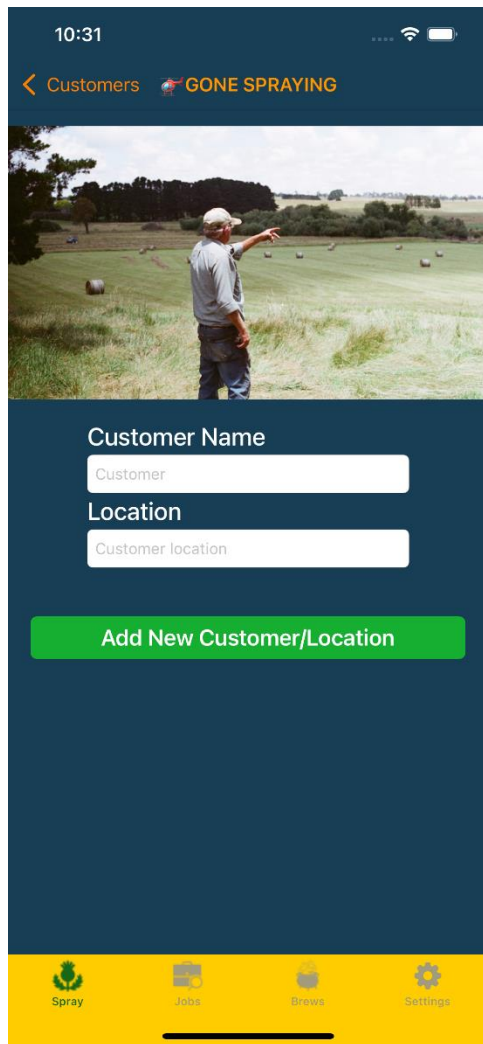

2.7 Begin Job

At this point you are ready to begin the spray job. If you know the ferry time add that in. I wait for my loader to fill me, then I hit the **Add** load button and **Go** on the stopwatch. When I come back, I **Stop** the stopwatch and then repeat the process until the job is completed.

Once finished click on the **JOB COMPLETE** button to go to the **REPORTS** screen.
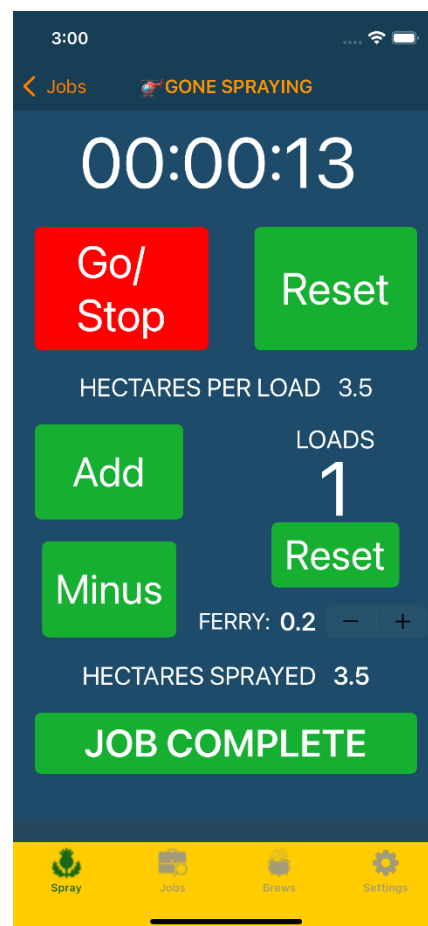

2.8 **Reports**

The report page will show you a summary of what you just completed including the following:

| ITEM	DESCRIPTION
Customer	The customer's name
Location	The customers location
Task	The task selected
Aircraft	Registration of the aircraft selected
Water Rate	Water rate based on the Task
Date	Date of the job
Started	Time the job was started
Finished	Time job was completed
Prod Time	Decimal time of the spraying
Ferry Time	Decimal time of the Ferry time
Total Time	Total time (Prod + Ferry)
Loads	Number of loads
Hectares or Acres	Area covered
Chemical 1	Name of first chemical
Used	Amount of chemical 1 used (based on load)
Chemical 2	Name of second chemical
Used	Amount of chemical 2 used (based on load)
Chemical 3	Name of third chemical

| Used	Amount of chemical 3 used (based on load)
Chemical 4	Name of forth chemical
Used	Amount of chemical 4 used (based on load)

Being able to quickly view the job output is great and useful when it comes to billing customers. Of course, the real value of **GONE SPRAYING** is the ability to save the reports and/or email them back to the office. This feature is available only with a subscription.

Having the history of what you did for a particular customer at your fingertips is also fantastic when you turn up a year later.

NB: This data is stored on YOUR device and in YOUR iCloud account. This means that if you have multiple accounts, it will sync all your data between all IOS devices. Handy to if you lose or update your device at a later date. Just download the app and you will have all your data back.

NB: The data is yours and yours alone. We do not save or have any copies. **It's yours to manage**.
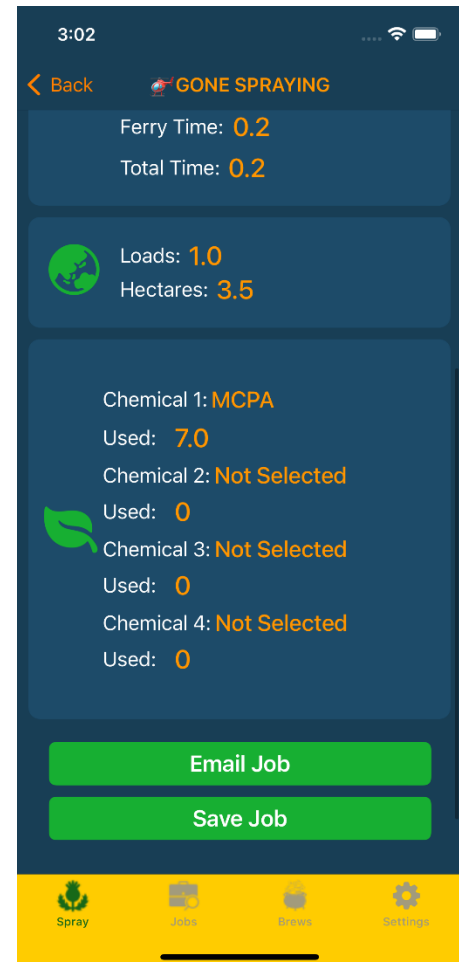

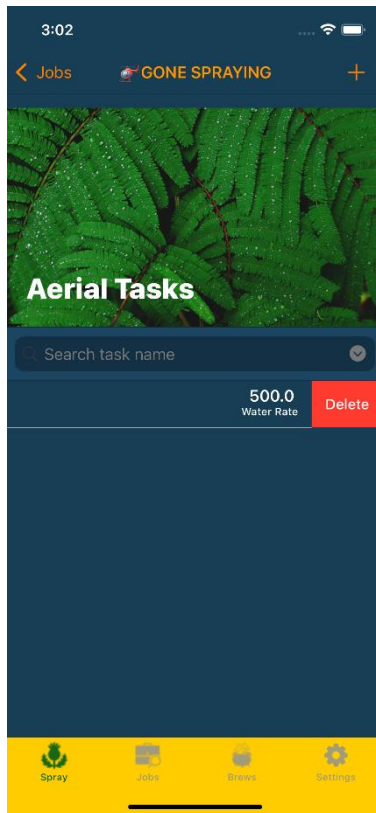

2.9 Deleting Items

Apart from the limitations between versions (see Subscriptions section below) you can delete individual items simply by clicking on the item (Aircraft, Jobs, Chemicals, Tasks or Customer) and swiping to the left.

3. SETTINGS MENU

From the settings screen you can perform the following functions:

3.1 Purchase a Subscription

Clicking on the **Purchase Subscription** button will take you through to the subscription screen where you can choose a subscription to unlock the other great options in **GONE SPRAYING**. See the Subscriptions section below for details.

The **Legal** button will show you our Terms and Conditions and the **Restore** button is used to restore your subscription if you delete or want to have your paid version on another device.

3.2 International

Here you can toggle between **Hectares and Acres**

3.3 Reset Database

Hitting **Reset** this will wipe all data in the **GONE SPRAYING** database on your device. Once you do this you will be back at the beginning. All Aircraft, Chemicals, Jobs, Customers, Tasks and Brews will be gone. **Be Careful!**

3.4 Email Address

If you have a paid subscription, you will see this option. Use this to set the '**TO'** field for the Email Reports.

NB: You can type the email address in manually when you send an email, but this saves you time by allowing you to have a single address saved. This address is only used for this purpose.
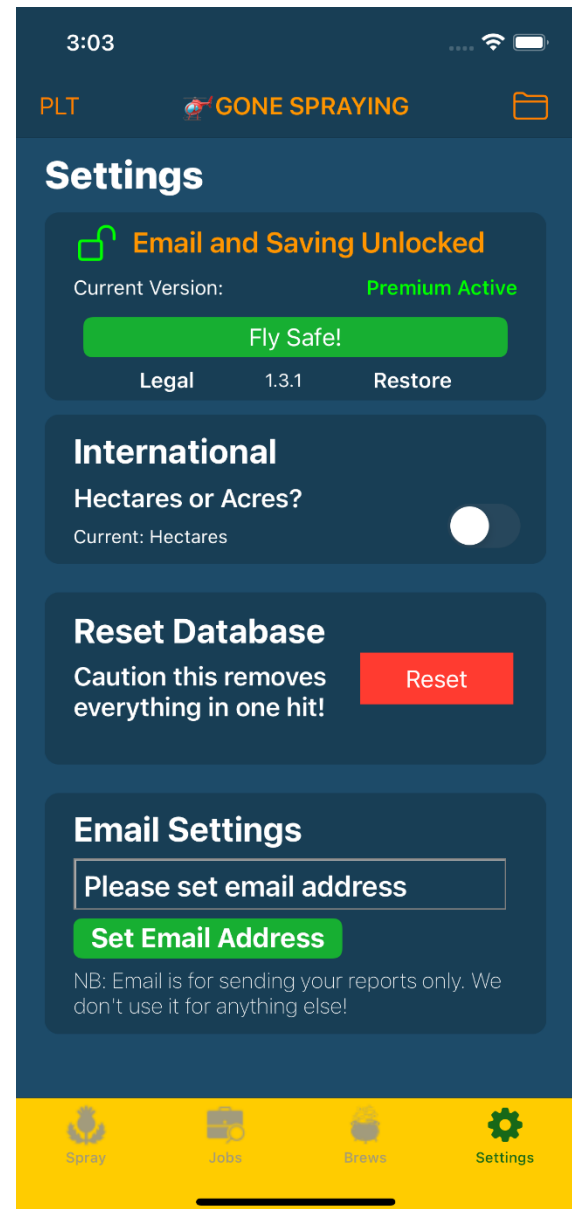

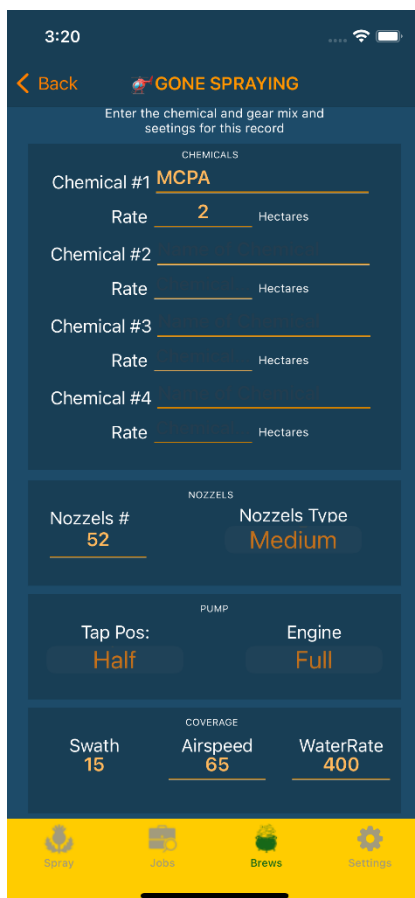

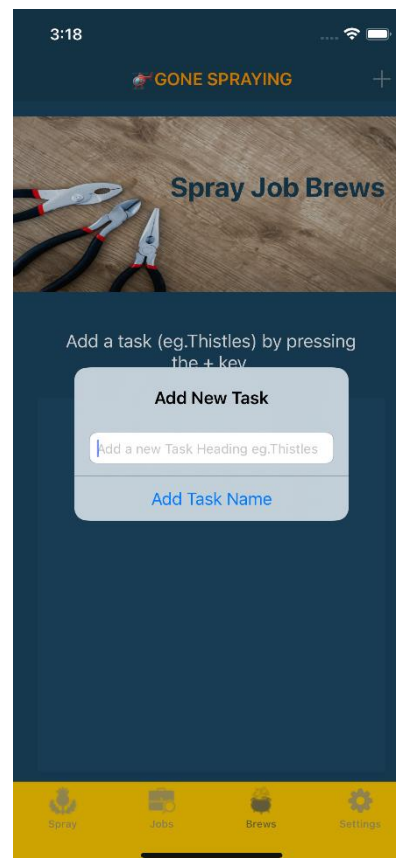

4. Brews

This feature is available to PREMIUM subscribers, and it allows you to save spray 'recipes' that you can reference.

You can break it down into different aerial tasks or simply have everything under one

4.1 Add a Brew Task

Click on the + to add a task. You can delete a task by click-hold and slide to the left. NB: If you have anything saved under the task it will be deleted.

4.2 Add a Spray Mix

Use the form to add chemicals, rates, nozzles, pump settings, aircraft configuration and you can also add notes. You can put in as much or as little as you like. The notes are displayed at the top making it easy to decipher at a later date. Again, you can swipe to the left to delete a Spray Mix.

5. SUBSCRIPTION OPTIONS

GONE SPRAYING comes in three versions.

5.1 Standard (Free)

If you are not interested in saving or email jobs then this is the version for you. You get access to the load counter and stopwatch which is still a great asset to have. I found this feature alone to be good because I only have one screen to work with when counting time and loads. If you fill in the job details, you will have a nice report at the end that you could record details from.

5.1.1 Standard Limitations
- Unable to email jobs
- Unable to save jobs
- No access to Jobs Screen
- No access to Brews
- Only 1 aircraft can be added

5.2 Pro Version

Pro version gives you a 'taste' of Premium access. With the ability to save and email jobs you now have access to the jobs screen where you can view previously saved jobs.

5.2.1 Pro Limitations
- Unable to delete individual aircraft
- No access to Brews
- 3 aircraft can be added
- 14 jobs can be saved

5.3 Premium Version

Premium is where it's at! This is the version we recommend. You have access to all features of **GONE SPRAYING** including the ability to delete individual jobs and aircraft. If you purchase the annual plan, there's a great discount to be had. Also we offer the first month free for the monthly Premium subscription.

5.3.1 Premium Limitations
- At the time of writing there are no limitations

Please consider a subscription to help support the future growth of this great product.

Here is an easy to view comparison between the versions:

Pricing Options	Standard FREE Forever	Pro $2.99 per month	Premium $5.99 per month or $60.99 per year
Add unlimited chemicals	✓	✓	✓
Add unlimited customers	✓	✓	✓
Add unlimited tasks	✓	✓	✓
